Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR Part 60, Subpart A), as well as the specific requirements at 40 CFR Part 60, Subpart F. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Portland cement plants.

Respondent's obligation to respond: Mandatory (40 CFR Part 60, Subpart F).

Estimated number of respondents: 95 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 14,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,290,000 (per year), which includes \$767,000 in annualized capital startup and/or operation & maintenance costs.

Changes in the Estimates: There is a small adjustment decrease in the respondent labor hours and the total capital and O&M costs from the most- recently approved ICR due to a decrease in the number of respondents. Consistent with past ICRs, this ICR uses the most recent data from EPA's Greenhouse Gas Reporting Program to estimate the respondent universe, which shows a decrease of 1 respondent as compared to the previous ICR.
